### **DETAILED ACTION**

1. This office action is in response to an amendment filed January 18, 2005. Claims 1-29, 35, 36, 46 and 47 were previously pending, with claims 13-16 and 18 withdrawn from consideration. Applicants amended claim 1 and added new claims 48-52. Claims 1-29, 35, 36, 46-52 are pending and will be examined.
2. Applicants' amendment overcame the following rejection: rejection of claims 1, 2 and 4 under 35 U.S.C. 102(b) as anticipated by Allen et al.
3. Applicants' submission of a sequence listing and amendment to the specification made the application compliant with the sequence rules.
4. There are no other rejections for claims 1-12, 17, 19-29, 35, 36 and 46-52. Claims 13-16 and 18, which were withdrawn from consideration as drawn to non-elected species, are rejoined with claims 1-12, 17, 19-29, 35, 36 and 46-52 in view of claim 1 being allowed.
5. The following is an examiner's statement of reasons for allowance: Applicants' invention is a method of sequencing nucleic acids using fluorescently-tagged polymerase and a mixture of fluorescently-tagged nucleotides. The closest prior art reference, Allen et al., teaches fluorescently-labeled polymerase but only one type of fluorescently-labeled nucleotides.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
